Data primarily come from Nathalie P. Voorhees Center (UIC) analysis of the 2000 Decennial Census, the 2010 Decennial Census, and 2010 American Community Survey (5-year estimates). Recent median home sale price and foreclosure filings come from MRED (mredllc.com) and the Woodstock Institute (woodstockinst.org), respectively. Non-family households are composed of singles or unmarried, unrelated people. Racial categories follow the Census Bureau's definitions to include those who have identified themselves as that race alone, as of two or more races, or as some other race. Additionally, under this definition structure, whether a person is Latino or not is defined as an ethnic (as opposed to racial) category. Thus, Latino individuals are both a member of one of the racial categories as well as the Latino ethnicity. Vacant units are currently unoccupied but still for sale or rent, seasonal homes, or additional units fit for habitation but otherwise not for sale or rent. Units where foreclosure has been initiated (occupants removed) but not yet legally completed (sold at auction) belong to this third category. Vacancy does not cover units under construction, unfit for habitation, or set to be demolished.
